My Visit to
THE SPRINGFIELD
SCIENCE MUSEUM
To visit the Springfield Science Museum we will enter through the WELCOME CENTER.

I do not have to wait in line again. I have my WRISTBAND.
I can use the **STAIRS** or the **ELEVATOR** to visit the different floors of the museum.
There are RESTROOMS located outside Dinosaur Hall and on the lower level. A large family-friendly bathroom is located in the Solutia Live Animal Center and Aquarium.

These restrooms have AIR HAND DRYERS which are loud. During Sensory Friendly Saturdays, PAPER TOWELS will also available in these bathrooms.
Sometimes **ANNOUNCEMENTS** are made over the speakers in the museum by Museum Staff. They might tell us about things that are going on, like a planetarium show.
One exhibit we might visit is **DINOSAUR HALL**. In this room, there is a giant **TYRANNOSAURUS REX**. He may be a little scary but he will not hurt me.
Another exhibit we can visit is AFRICAN HALL. This room has a RAMP that brings me to the second floor.

There are many BUTTONS I can push along the way to hear ANIMAL NOISES. I will stay in the walkway.

I can LOOK at but not touch the animals.
On the second floor, I can visit **EARTH HALL**. There are many different **ROCKS** in this exhibit.

I can also look through a **WINDOW** to see the **Tyrannosaurus rex**’s mouth.
My family and I can see a **PLANETARIUM SHOW**. We will hand our **SPECIAL TICKETS** to **MUSEUM STAFF** before entering the show.

It will be very **DARK** inside the planetarium. The show is projected on the **CEILING** of the room and the **CHAIRS** tilt back so we can see.
The **TAKE A BREAK SPACE** is located on the second floor outside Mineral Hall and the Planetarium.

This is a **QUIET** room I can go to if I need a break.
On the lower level, I can see animals in the SOLUTIA LIVE ANIMAL CENTER. There are turtles, fish, snakes and other animals.

I can LOOK at the animals, but I will not tap on the glass because that might scare them.
I had a great day at

THE SPRINGFIELD SCIENCE MUSEUM!
