Make a 3D Lotus Flower

Lotus flowers are a common theme in Buddhist art. They symbolize wisdom, love, and achievement.

Materials:
- 1 sheet of green paper
- 2 cupcake liners
- a crayon
- a glue stick
- scissors

Step One:
To start making your lotus at home, first cut your green paper into the shape of a leaf. Lotus leaves often look like the top shape of a heart, but round at the bottom where the point might be.

Step Two:
Next, press your cupcake liners down flat. Fold each in half, and cut a scalloped edge around the ridge of each liner.

Step Three:
Unfold the liners and glue one inside the other. Then glue the bottom liner to your leaf.

Step Four:
Use your crayons to add details to your lotus. You can add a colorful center to the flower and leaf veins around the flower.
